

TOPOGRAPHICAL MAP
OF
EGG HARBOR AND VICINITY

INCLUDING THE ATLANTIC SHORE FROM
BARNEGAT TO GREAT EGG HARBOR

From Original Surveys and Levelings based on the
Triangulation of the U.S. Coast and Geodetic Survey.

GEORGE H. COOK, State Geologist, JOHN C. SMOCK, Assistant Geologist
C. CYRHEULE, Topographer.

1885.

NOTE. The curved lines are level lines drawn on the earth's surface. All points through which any given line passes are at the same level and their height above mean sea level is shown by the figures on the line. The rise or fall from any line to the next is as the figures with their figures set on any line show the actual elevation of the surface at a point indicated by a small cross. The dotted lines on the blue ground are lines of equal depth of water, and the figures accompanying show depth at mean or half tide.

- TIDE MARSH
 - FRESH MARSH
 - SWAMP
 - SWAMP
 - CRANBERRY BOGS
 - RAILROAD STATIONS
 - Geodetic Station

NOTE.
The shore lines of ocean bays and channels from
South Atlantic, northward, are from the plane-table
sheets of the U.S. Coast and Geodetic Survey, surveyed
between 1890 and 75, revised to 1883.
